01	<p>FA2100 CVDR Unit</p> <p>Visually inspect the FA2100 CVDR (and ULD), GSD41, accelerometer, potentiometer, impact switch, summing amplifiers, and area microphone for security of installation, undue deterioration and wear, corrosion or any other form of damage. Check that these components are clean and nameplates are legible. Visually inspect the associated electrical connectors and strain reliefs at the mounting trays. Check for cleanliness, unwarranted looseness, foreign material, properly installed clamp points, wire damage, and bend radius. Visually inspect the associated wiring for signs of wire degradation, evidence of broken, charred or corroded wiring. Look for evidence of: moisture or fluids contamination, wire discoloration due to contamination or heat, wire damage resulting from vibration (under clamps and tie straps), damage due to improper maintenance, and damage due to foreign material. If any wire degradation is detected, identify and eliminate the cause leading to wiring degradation.</p> <p>RESULT: <u>GOOD</u></p>	 	N/A
