**Note:**

- Make sure that inertial separator in normal condition, no bleed air extracted from the engine and air condition OFF.
- This table only applies to altitude 0-500 feet MSL. For higher altitude, refer to EMM 72-00-00.
- Max fuel flow is 580 lb/hr fuel flow is not more than 15 lbs/hr higher than the value shown in table.
- If parameters are outside the target performance table to EMM chapter 71-00-00.

**REMARKS:**

Carried Out.

**Appendix D08 – Engine PT6A-140 100 Hours/Minor Inspection**

Reg. Mark : PK - SN4.  
 MSN : C208B:5639.  
 TSN / CSN : 2589:46/3981

Date : 13 Aug 2023.  
 Station : TMH.  
 WO No. : WO/048-SN49/VRI/2023

| ITEM CODE NO. | ZONE | TASK                                                                                                                                | SIGNATURE                                                                             |                |
|---------------|------|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|----------------|
|               |      |                                                                                                                                     | ENGINEER SIGN&STAMP                                                                   | RII SIGN&STAMP |
| F710001       | 130  | Do a check of the FCU manual override system for static operation.<br>For the engines installed with a manual override system only. |    |                |
| F710003       | 130  | Do a compressor performance recovery wash                                                                                           |    |                |
| F720000       | 130  | Do a visual inspection of the Control Linkages and wiring.                                                                          |    |                |
| F720001       | 130  | Do a visual inspection of the engine exhaust duct welds.                                                                            |    |                |
| F720002       | 130  | Do a visual inspection of the engine exhaust duct for cracks.                                                                       |   |                |
| F720003       | 130  | Do a visual inspection of the gas generator case and the center fireseal.                                                           |  |                |
| F720004       | 130  | Do a visual inspection of the rear fireseal mounting ring.                                                                          |  |                |
| F722001       | 130  | Do a visual inspection of the air inlet screen.                                                                                     |  |                |
| F723000       | 130  | Do a visual inspection with a mirror or a borescope inspection of the First-stage Compressor Rotor and the Inlet case for corrosion |  |                |
| F725005       | 130  | Do a detailed inspection of the turbine exhaust duct.                                                                               |  |                |
| F731002       | 130  | Do a check for the fuel pump installation and leaks.                                                                                |  |                |
| F731003       | 130  | Do a check of the oil-to- fuel heater installation                                                                                  |  |                |
